

Project Pitch

Project Description

People will be able to post cool activities in their area. People who go on an activity will post a picture of themselves attending the activity. Users will get "likes" or "karma" for every user who responds to an activity.

Team

I have already recruited members for this project

SQL

Leaning towards SQLite but will probably change

NOSQL

Will try to use a flat file system because very easy

Business

Ad campaigns
Premium tier for users to get rid of ads
Contemplating donation only application

Legal

No foreseeable legal considerations

Technical

We will be using react to create a mobile application
